

The Carbon Chronicle

VOLUME 35: No. 45

ACME, ALBERTA, THURSDAY

DECEMBER 13th., 1956

\$1.50 a Year; 5c a Copy

Mr. Adam Buyer has returned home from the hospital and glad to say he is greatly improved.

Harold Bramley and children and Mrs. Tricker were Sunday visitors at Calgary visiting Mrs. Bramley who is still a patient in the General hospital.

Hospital patients this week include Mrs. Ed Foster in the Drumheller hospital and Doris Bramley and Baby Tetz in the Calgary General hospital.

Mr. George Appleyard Sr. of Victoria, B.C. arrived Thursday to spend the holidays at the homes of his sons, Jack, George and Joe.

Many of our homes are beautifully decorated and showing quite a beautiful light display.

Hugh Isaac is the F.U.A. delegate for Carbon attending the convention in Edmonton Dec. 10 to 15.

UNWANTED HAIR

Vanished away with Saca-Pelo. Saca-Pelo is not like ordinary depilatories that remove hair from the surface of the skin but penetrates through the pores and retards the growth of the hair. Lor-Beer Lab. Ltd., Ste. 5, 679 Granville St., Vancouver, B. C.

FOR SALE—House and three lots. Four rooms and porch. Water and Sewerage. Reduced price for cash.

—Apply Mrs. H. Hunt, Carbon, Alberta.

BLUNTS PRIVATE NURSING HOME—Efficient nursing care for young and aged—Spotlessly clean—Inspection invited. Registered nurse in charge. Phone 694128 — 1120-6 Ave. S.W., Calgary. Matron formerly Mary Lammie, R.N. of Swallow.

The Turkey that was put up by the Pope Lease W.I. was won by Sparky's Garage, Drumheller with lucky No. 702.

Grades 1, 2 and 3 held their Christmas tree entertainment on Friday evening. Many beautiful costumes were worn and several very interesting numbers were presented. Santa arrived on time as usual and gifts were exchanged by the pupils, after which each child was given a large bag of nuts and candy by the Lions Club.

Obituaries

JAMES GORDON

Carbon lost one of its pioneer citizens, James Gordon who passed away at the age of 73 years at his home on Tuesday. James Gordon has been a resident of Carbon for 53 years. He was a member of the Carbon Old Timers, being President several times, M.C. for all old timers reunions; a very active member of the Carbon United Church, being on the board for several years, a school trustee, Red Cross worker, etc. He will be greatly missed in this community for his untiring efforts, and

He is survived by his widow was one of our outstanding men Margaret; one daughter Alice; four sons, Charles of Olds; Cliff, John, and Don of Trochu; one brother, William of Calgary; and seven grandchildren.

Funeral services will be held Saturday afternoon at 2 p.m. in the Carbon United Church with Rev. Hutton officiating. Interment will be in Carbon cemetery with Winter Bros. in charge.

MRS. CLARA GREENHALGH
Mrs. Clara Greenhalgh, 87, 919-4th Ave. W., died in General hospital Thursday.

Born in Chorley, Lancashire, England, she was an old timer of the Carbon district where she lived from 1910 until coming to Calgary in 1944. She was a member of St. Barnabas Anglican Church.

Surviving are her husband Robert, Calgary and a brother Thomas Mansley, England.

Funeral services will be held in Jacques Funeral Chapel Monday at 1 p.m. with Rev. Dr. T. L. Leadbeater officiating. Burial will be in Queen's Park cemetery.

CONTROLLED COMFORT

That's what you get when you dial sleep on the automatic control of your electric blanket. You get the same gentle restful warmth all night regardless of changes in room temperature, so for the Rest of your life get an automatic electric blanket today. Gone are the days when you have to wash a mountain of blankets. With an automatic electric blanket only one is needed for each bed. For warmth without weight, for constant sleeping temperature, get your automatic electric blanket today.

The local curling rink and skating rink will soon be open again for another season. Caretaker for the skating rink is Waiter Hay.

Dal Edmundson, Pool elevator agent at Hesketh was among nine long-time Wheat Pool employees who were honored at a dinner in Calgary last week. In recognition of having completed 25 years in the employe of the Alberta Wheat Pool he was presented with an engraved wrist watch and made a member of the Pool's Quarter Century Club. Presentation of the watch was made by director Nels Malm of Vauxhall, who spoke appreciatively of Mr. Edmundson's service to the organization over the years.

Mrs. Edmundson accompanied Dal to Calgary and received an engraved silver spoon.

Mr. Edmundson served his entire 25 years with the Pool at Hesketh.

ANGLICAN CHURCH NOTES

Christmas Services at Christ Church will include a Midnight Communion Service on Monday, Dec. 24th at 11:30 p.m.

There will be a Church Pot Luck Supper and Children's Christmas Concert on Dec. 28 in the Carbon Scout Hall.

Have you sent in your Christmas Seal contribution for this year. Remember this is the only source of funds to help fight tuberculosis which is still a killer.

Acme Senior Basketball Team continued its losing streak Sat.

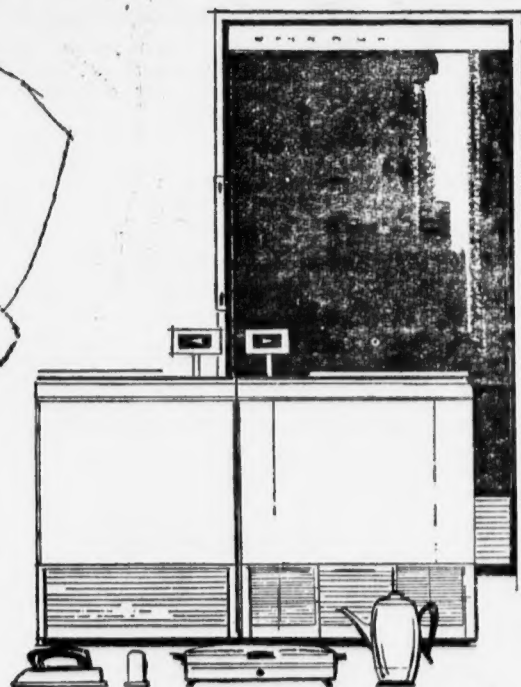

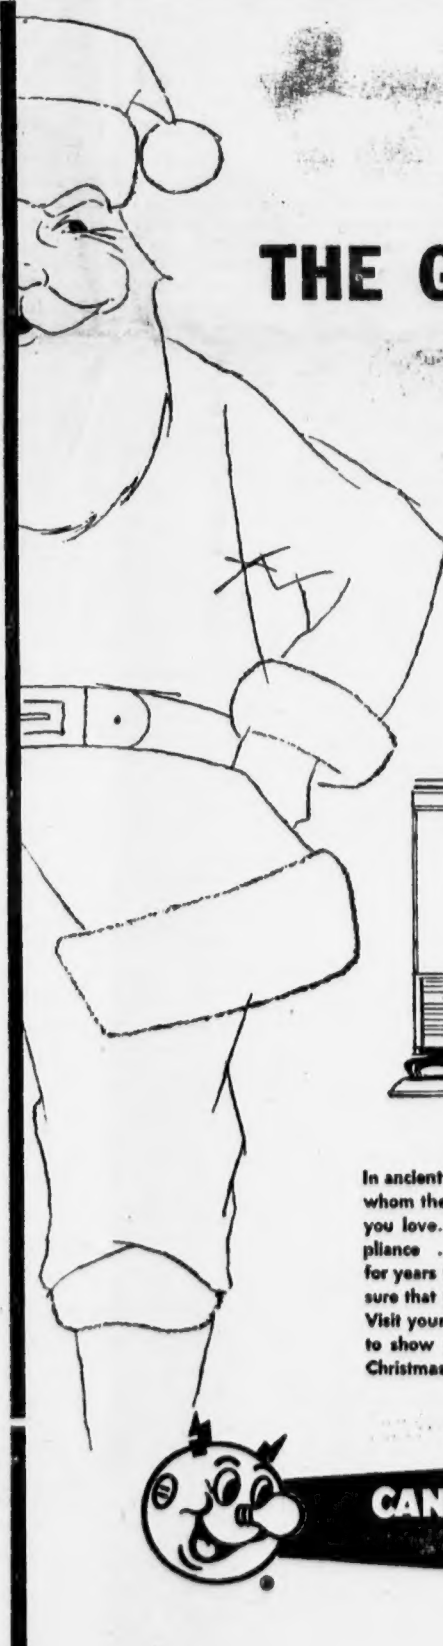

night when Calgary Navy defeated Acme 63-57. Acme's last quarter rally almost spelled the difference but it was too late. Scorers for Acme were: Del Bates 22, Jack Appleyard 17, Dunc MacDonald 8, Steve Semenchuk 6, John Skakun 2, Don MacDonald 2.

Navy scorers were: Samon 20, Bond 15, Warner 14, Goronuk 8, Smith 4, Martin 2.

The rarest of collectors' items among Christmas Seals is the 1913 Type One Seal issued in the United States. Only 100 were printed.

A NEW SERVICE FOR PEOPLE AT LINDEN AND SWALWELL
BARKMAN'S STORE, LINDEN and A1 SERVICE, SWALWELL are agents for **COUNTRY SERVICE of THREE HILLS** and will carry **PROPANE BOTTLES, etc**

THE GIFT OF KINGS

In ancient times Kings gave gifts of servants and slaves to those whom they admired. This year you can give presents to those you love. Give everyone on your list a beautiful electric appliance . . . an electrical servant that will be appreciated for years to come. You can make your choice with confidence, sure that your gift will express the warm wish that you intend. Visit your nearest electrical appliance dealer. He will be happy to show you a complete selection of electrical appliances for Christmas giving.

Good manners would enhance even a weak argument

(From The Canadian, Camrose, Alta.—September 12, 1956)

Last Sunday morning we were listening to a Parliamentary Press Gallery radio feature when an embassy official at Ottawa was broadcasting on behalf of his own country. We were amazed that the CBC would pass a script that contained such an unwholesome reference to the British tenure in India. After all, one does not go right into the sacred precincts of a neighbor's home and regale to him all his faults. It is incidents like these that have undermined the confidence of the Canadian radio listeners in the higher echelons of the CBC. For years the CBC has winked at the rampant Communist propaganda that has been broadcast over Vancouver stations, but after all, one does not harbor a nest of rattlesnakes in his own kitchen. Getting back to the man speaking on India, he reminded us very much of certain Mexican patriots we met in that country last winter. He is convinced that all the recent progress in his own country is due to the efforts of the Indian people alone. Actually, what really happened was that World War II poured so much of the world's wealth in her lap for the purchase of munitions and supplies that she found herself in a revolutionary upsurge of national consciousness. In Mexico it was the ready sale of her petroleum supplies during the war that set her up as a national figure. We grant the premise that Britain did not do all she might have done for the Indian people, but she did keep them from slaughtering one another off, which, in the opinion of many world observers, might have been a mistake. Anyway, as soon as Britain withdrew from India the civil strife resulted in the common slaughter of some six millions of her people, the race riots being between the Hindus and Moslems. Only by outside intervention did this slaughter cease, with Indian and Pakistani forces still standing poised on one another's boundaries. All this was not mentioned by the Indian speaker last Sunday morning. We feel that the CBC should teach him some good manners before allowing him the freedom of Canada's airways a second time.

Canadian citizenship

(From The Times, Morden, Manitoba—November 7, 1956)

Canadian citizenship will be conferred on 19 new Canadians in an impressive ceremony in the Collegiate Auditorium Wednesday evening. The Kinsmen Club of Morden are to be highly commended for their work in connection with this event, which is of sufficient importance in a democracy such as ours to be almost ignored by most Canadians. Thanks to the actions of the Kinsmen, a good number of citizens in this community have attended similar ceremonies in the past couple of years, and, it is hoped, will do so again.

The ceremony holds something of interest and value for us all. The Kinsmen provide a setting that is conducive to appreciation of the significance of the occasion with the decorations, the flag-bearing scouts and guides, and a speaker of note. These help to create a spectacle with pageantry and glamour. And the repetition of the Oath of Allegiance can not help but make an impression on those that have never heard it or had occasion to utter it. Everyone who attends will take home something of value, and perhaps this will include a fuller awareness of the privilege we enjoy in being Canadians.

The heart of a child

(From The Eagle, Rosetown, Sask.—October 4, 1956)

The following by Willis J. Potts, M.D., Chicago, as printed in the Journal of the American Medical Association should be of interest to parents and teachers as well as others who are concerned about the welfare of the child.

The mystical heart of a child is a precious and beautiful thing. It is marred only by wounds of a thoughtless and not too intelligent world. In a physical sense the heart is a tough organ; a marvelous mechanism that, mostly without repairs, will give valiant pumping service up to a hundred years. In an emotional sense it is susceptible to wounds of indifference, thoughtlessness, and neglect and during episodes of illness is especially vulnerable. The heart of a child is mysteriously moulded by parents, teachers, playmates, and all those with whom it comes in contact. Physicians wish during those short but violent episodes of illness to avoid wounds that will leave irreparable scars. I am convinced that the heart of a child sunned by love, security, and understanding will be able to withstand the storms of illness and pain.

Long and Short of It

I'm fond of conversing with folks of the sort
Who know how to render a long story short.
However, I happen to know quite a throng
Of experts at making a short story long!

WOODEN SOLDIERS NEVER DIE—They're just stored away. Standing at attention, though facing in various and sundry directions, these wooden soldiers dwarf a human-sized guard. The tall blockheads are waiting shipment to another building where they will add a happy martial air to a children's show in Paris, France.

Big emerald found inside fish part of proceeds of robbery

When a haddock was cut open in a fishing boat off Wick, Caithness, recently, a 1943 three-penny bit was found. The finder said he would keep it as a mascot for the rest of his life.

Many seamen believe that anything found in a fish is lucky. A bass caught off the Devon coast in 1939 certainly brought luck to a holiday-making angler. He and his wife decided to have it for supper and while preparing it he found a large emerald in its gullet.

It proved to be part of the proceeds of a robbery. How the emerald got into the fish's gullet was never discovered, but the finder pocketed the \$250 reward which had been offered several years before for its recovery.

When a Grimsby trawler reached port in 1923, a fisherman named Blyth proudly exhibited a sovereign which he had found inside a codfish caught 160 miles from Spurn Head. It bore the date 1915 and appeared to have been battered by the force of an explosion which apparently blew up an unknown ship during the First World War.

It was believed that the sovereign was gulped by the cod as it went shimmering into the depths of the sea.

Cod are very greedy and will swallow anything bright. In the

Relatively speaking

An elderly chap, 80, bought a small place on sixth avenue SW. It needed shingling, and he undertook to do it himself, in spite of a game knee.

He was able to complete the job, with the help of a "younger relative". The younger chap won't be 80 for a whole week! 3222

Gulf of St. Lawrence a fisherman found an emerald brooch in a large cod. A Kingston shopkeeper's assistant found a gold wedding ring in the mouth of a cod bought at the Billingsgate Market in London.

Another gold ring was found inside a seven pound cod landed at Whitby. A jeweller who examined it said it was of the design known as the lover's knot which was very popular 40 years ago.

In Boyne City, Michigan, Mrs. H. Robinson could hardly believe her eyes when she cut open a fish and found inside the earring she had lost two years previously at a fish hatchery.

A small shark landed off the North American coast was found to contain a handbag in which were four English sovereigns, six shillings, four United States dollars and a love letter. The writer of the love letter was eventually traced. He had written it 20 years previously and had been married happily for 15 years—but not to the woman to whom he had sent the love letter!

SMILE OF THE WEEK

There are two things about a wife's new evening gown that intrigues her husband: how much he will have to put into it—and how much she will leave out.

★ ★ ★

In front of a New York restaurant, the absent-minded chairman of a huge book club sat patiently at the wheel of his car while the traffic light some distance ahead on Fifth Avenue turned red and green six times. At this point his wife thought it wise to point out to him that he was in line behind a rack of empty taxicabs waiting for customers.

In reading, the eye sweeps across a line of type in a series of jumps, focussing on the type at successive points.

Christmas Time Is Ideal for Taking Pictures

BY EDNA MILES

FOR picture-takers, Christmas offers opportunities that don't come at any other time of the year. And even those who aren't camera bugs are tempted to try their hands during the holidays because so much good picture material is to be had.

You can start, if you like, with the holiday preparations, from the stuffing of the turkey or goose and the wrapping of the gifts right through to the tree-decorating festivities. Pictures of the family grouped around the table for Christmas dinners are naturals.

Christmas Eve is a night dear to everyone. With an easy-to-use, inexpensive camera, you can get close for better snapshots. If your camera has a distance dial, you can focus it down to four feet for real close-ups of Dad reading to the kids, the kids waiting for Santa Claus or an egg-nog party with old friends grouped around the tree.

When you take pictures, keep in mind the fact that these holiday highlights will make fine subjects for next year's photographic Christmas greeting cards. The photographic greeting carries with it a real feeling of personal warmth and it's a Christmas keepsake, too.

Informal family snapshots will be enjoyed long after tinsel is put away. Using small, inexpensive camera, you can take a group shot of Dad reading to kids on Christmas Eve.

The Minister Takes a Lesson in Art

World's weather warmer

Though there is no immediate prospect of palm trees growing in Canada, or of Siberia becoming a summer resort, most experts believe the weather of the world is growing warmer.

The world's annual mean temperature has increased one degree in the last 75 years. In most of the United States, the summers have become one degree hotter, the winters two to four degrees warmer. In Iceland and Greenland the average annual temperature is up six to 12 degrees.

Vegetation and timberlines are creeping up mountain slopes. The Carolina wren, vulnerable to cold, has been sighted in Ontario, and the mockingbird, seldom seen even in Washington, D.C., 75 years ago, is now common in Philadelphia.

An increase of two degrees in temperature may not sound like much, but it is enough to give Philadelphia the climate today that Baltimore had in 1885, the equivalent of nearly 100 miles of latitude.

And it is true that the number of hurricanes have increased along the Atlantic seaboard. New England, which used to average three big tropical storms a century, has had three in the past two years.

Weather changes produce unexpected effects. Light-snowed winters plague ski resorts. Warmer, saltier ocean currents flowing northward have carried the cod, which used to be a Massachusetts staple, 620 miles north in 27 years.

The article offers various theories which may explain these weather changes, "anticyclones," revolving clockwise above the Atlantic and Pacific and forcing warmer air on the coasts of the Western hemisphere, volcanic eruptions which make a cooling shield between earth and sun and then warm the earth when the particles fall, the carbon dioxide in the atmosphere, pumped there by the burning of coal and oil.

Dr. Hurd C. Willett of the Massachusetts Institute of Technology believes that the earth's temperature is affected by periods of sun-spot activity, followed by periods of relative solar quiet, each about a half century long. Dr. Willett believes we have just turned the cyclical corner and are headed for a 50 year period of "old-fashioned" winters.

CALL FOR BIDS ON OIL RIGHTS

Bids have been called by the B.C. Department of Mines for petroleum and natural gas rights on nearly 2,000,000 acres in the Peace River area of the province.

Bids for permits will be accepted on 21 parcels of land covering a total of 1,879,058 acres.

Tenders will be received until January 14, 1957.

"See Manitoba first" Jobin tells tourists know their own province

Hon. F. L. Jobin, Minister of Industry and Commerce, recently urged more home investment in Manitoba industry, is now pressing for Manitoba tourists to get to know their own province better.

He told the fifth annual convention of the Manitoba Tourist Association that a stronger bid should be made, both provincially and nationally, for the Canadian

and provincial tourist dollar. He said some operators were becoming "blind" to the importance of Canadian tourists.

Last year, said Mr. Jobin, \$303,000,000 was spent in Canada by outside tourists; at the same time Canadians spent \$363,000,000 in the U.S.

Leo Dolan, head of the Canadian Tourist Bureau explained that a substantial portion of Canadian tourist money spent in the U.S. was in fact "shopping money".

Manitoba's travel and publicity director, W. B. Fraser, said there was as well a pressing need to get more of the U.S. tourist dollar. Before the last war, Canada got 50 percent of all U.S. tourist money spent outside their own country. Now, the figure is only about 20 percent.

Lake Okeechobee, in Florida, is the largest fresh-water lake which is situated entirely within one state in the United States.

YOUNG AT HEART

During a trial some years ago, the judge asked a witness: "Do you have any brothers or sisters?"

"No, my only sister died 150 years ago."

The judge looked incredulous.

"That's not possible."

"On the contrary," said the witness. "At the age of 20 my father married and had a daughter. She died in infancy. When my father was 72 he became a widower. He married again. Four years later I was born, and I am now 94."

:: GEMS OF THOUGHT ::

MAN

Man's capacities have never been measured; nor are we to judge of what he can do by any precedents, so little has been tried.—Thoreau.

God expresses in man the infinite idea forever developing itself, broadening and rising higher and higher from a boundless basis.

—Mary Baker Eddy.

A man is like a bit of Labrador spar, which has no luster as you turn it in your hand until you come to a particular angle; then it shows deep and beautiful colors.

—Emerson.

We need not worry so much about what man descends from—it's what he descends to that shames the human race.

—Anonymous.

Man himself is the crowning wonder of creation; the study of his nature the noblest study the world affords.

—William Ewart Gladstone.

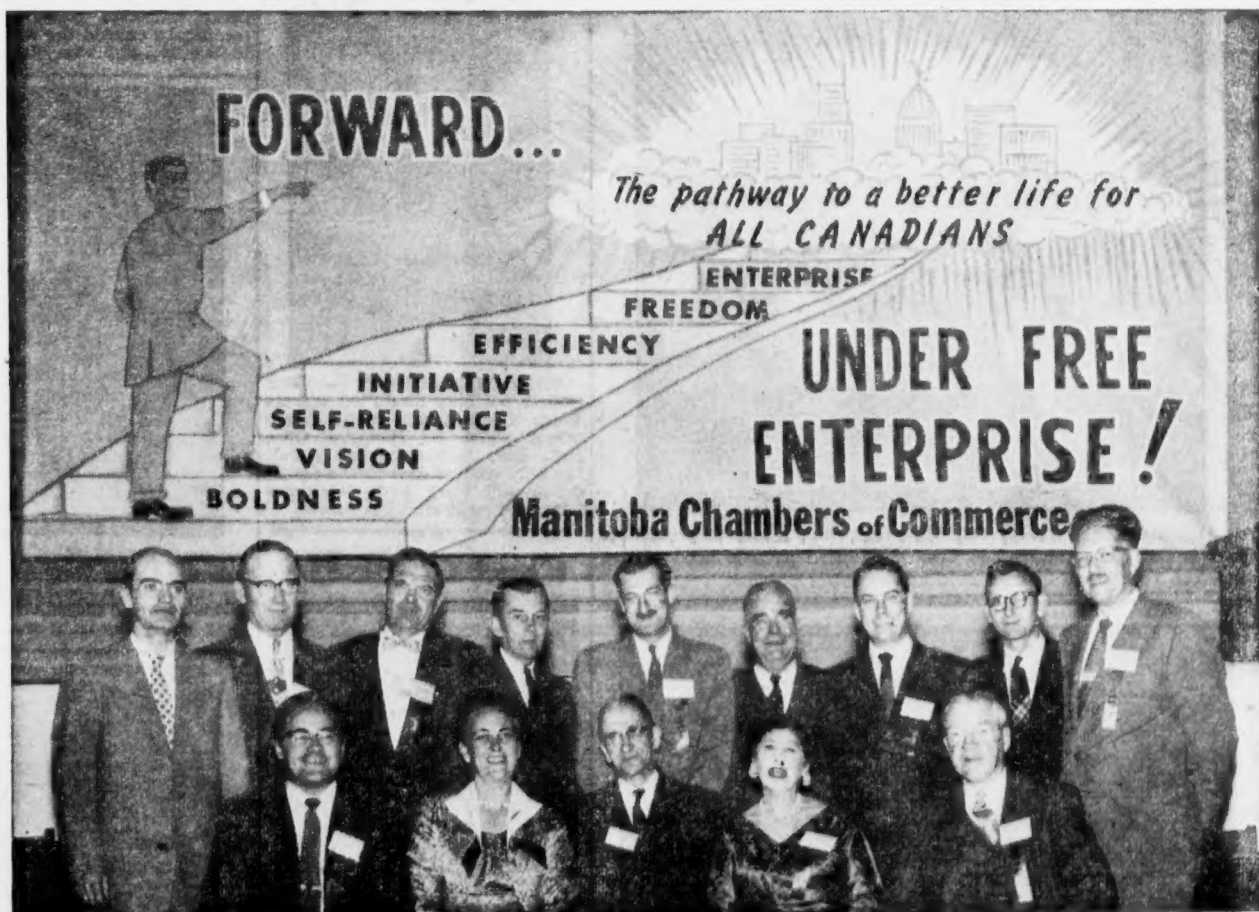

While the class looks on, Hon. Woodrow Lloyd tries his hand at water color painting, with the teacher, MacGregor Hone, an interested onlooker. The Regina showing of the Junior Art Exhibition, sponsored by the Saskatchewan Arts Board, opens at Central Collegiate on December 3. It opens in the Saskatchewan Teachers' College, Saskatoon, on November 19. —Sask. Government Photo.

COMMITTEE SCANS ABSENTEEISM

Absenteeism costs Canadian industry millions of dollars a year, reports The Financial Post. A committee headed by Dr. Charles W. MacMillan, professor of Health and Social Medicine, McGill University, finds:

1. A small number of workers are responsible for most of the absences.
2. Workers under 20 have the highest rate of absenteeism.
3. Those over 50 lose fewer days than any group.
4. Women are absent more frequently than men.
5. The day after payday, and Mondays, are "black" days.

Manitoba Chambers of Commerce 26th Annual Convention

A unique feature of the recent Manitoba Chambers of Commerce 26th annual convention was the publication of a 24 page newspaper, "The Convention Pictorial" carrying 120 columns of up-to-the-minute news and pictures of the convention proceedings written by a group of Manitoba weekly newspaper editors who take an active

part in the local and provincial chamber work.

In the picture, taken in front of the huge mural which formed the background of the speakers platform, are shown, left to right, front row: Harvey Friesen, Winkler Progress; Helen Marsh, Dauphin Herald; A. W. Hanks, St. James Leader, editor-in-chief of the Pictorial and in whose plant

the paper was printed; Dorothy Ridge, Deloraine Times; R. W. Tuckwell, Manitoba weekly newspaper legislative correspondent; back row: Art Heppner, Morden Times; Mel McDonald, Pilot Mound Sentinel; Gene Derksen, D. K. Friesen, Red River Valley Echo, Altona; Charlie Hawkins, Manitou Western Canadian; T. M. Beveridge, Norwood Press; Herb

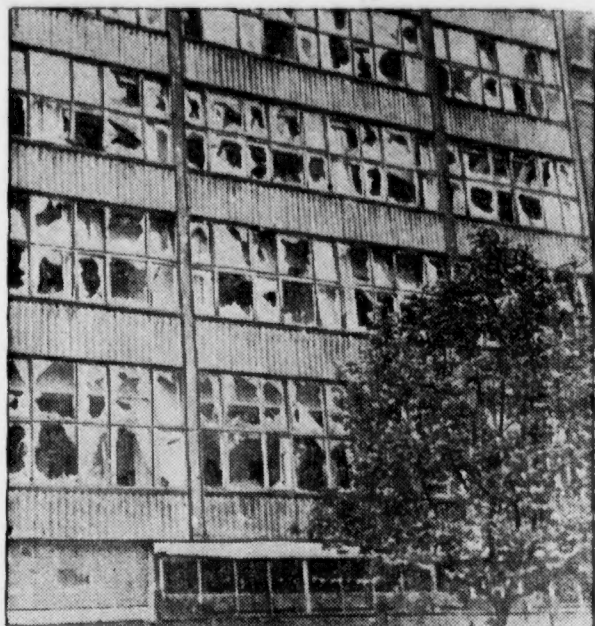

Rutar, Russell Banner; Frank Presunka, Glenboro Gazette; Tom Wilkins, Killarney Guide.

The paper was delivered to each of the three hundred odd delegates and guests at the closing dinner of the convention, and 3,000 copies are being circulated throughout Canada as a production unique in the annals of weekly newspaper journalism.

World Happenings In Pictures

DIGGING BULBS NO LONGER POPULAR—It used to be the garden fashion to dig up Dutch bulbs every spring, dry them and plant them again in the fall. Not so today. The simplest way to grow bulbs in Canada now is plant them deep, let them grow and bloom for three years, then dig them up and discard them. Bulbs are cheaper today than ever before and the average gardener simply hasn't the time to spend digging, cleaning, drying and so on. A small investment allows big returns by digging deep and leaving the bulbs for several years.

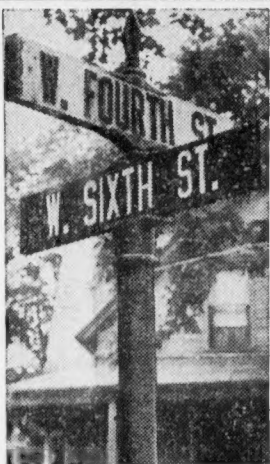

SHATTERED GLASS, SHATTERED DREAMS—In Budapest, Hungary, the evidence of the furious fighting waged between Russian troops and Hungarian rebels. For brief hours, it appeared that the rebels had won their freedom from Soviet domination. Russian might has crushed that illusion, and terror and mass executions have swept through the scarred capital. The shattered windows will be easier to replace than the shattered dreams.

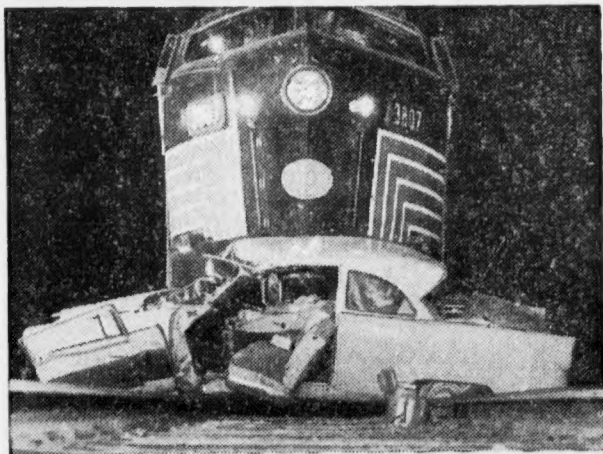

POPE PIUS talks with Father Riccardo Lombardi, founder of the Catholic Action Association's Foundation For a Better World, at Castel Gandolfo, Italy. The Pope, visiting for the first time in his pontificate outside the boundaries of Vatican City, stopped off at the Foundation on his way back to the Vatican from his summer residence.

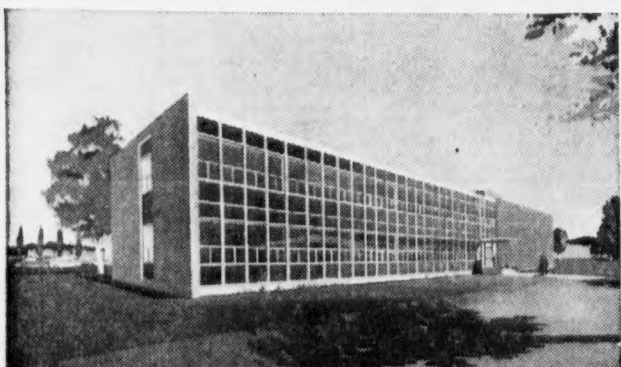

HUNGARIAN SYMPATHIZERS protesting recent Soviet actions in war-torn Hungary, parade near the United Nations headquarters in New York wearing armbands and carrying placards.

WHO'S CONFUSED? — West Fourth not only meets but bisects West Sixth—that's what these street signs, in Michigan City, Ind., say. Out-of-towners aren't the only victims of confusion; residents still don't know whatever happened to West Fifth Street.

DON'T LET THIS HAPPEN TO YOU—Death flagged down the train for Phillip Watkins, 21-year-old from Indianapolis, Ind. He lost the race with a speeding train, and paid for it with his life, as the engine dragged his car a half mile down the track. Play it safe, and avoid being the body they have to carry away from the wreckage.

THE NEW RESEARCH LABORATORIES of the Pulp and Paper Research Institute are shown above in an architect's sketch. When finished in the late summer of 1957, the laboratories will provide a scientific centre for diversified research and graduate education. The new building is being provided for the Institute by the Forestry Branch, Department of Northern Affairs and National Resources, at a cost of \$2,250,000.

Chest Check-Up

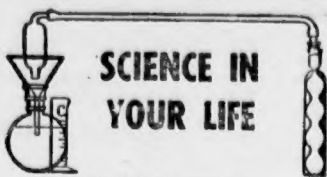

She's playing safe by having her chest checked for tuberculosis. Christmas Seals help pay for your tuberculosis association's efforts to find unsuspected cases of TB. The 1956 Christmas Seal Sale is now being conducted by TB associations throughout the country.

LONG LONELY RIDE—On a rainy country road, a group of peasants ride towards Magyarovar, Hungary, to attend the funeral of more than 80 persons killed there during the uprising against Communist rule. Huge crowds from nearby areas gathered in Magyarovar to mourn victims of the insurrection.

FOR SALE—1953 Fordson Major Tractor. 3 Milch Cows. 100 Young Laying Hens. Brooder House 14x18 ft.

—Fred Trenchuk, Acme.

SCIENCE IN YOUR LIFE

World Champion

What makes a world champion—is he really much different from the average man? Scientists throughout the world have studied athletes and generally have found that the champion is not very much different at all.

The athlete, of course, is in peak physical condition. His reflexes and his stamina may be better than yours—but as a rule, he is not endowed with an extra-large heart, superior blood, or an additional set of muscles.

"Athlete's heart" is a fallacy. Sir Adolphe Abrahams, honorary medical officer of the British Olympic Athletic Teams, found there was no valid evidence of "athlete's heart" in Olympic contestants and they were certainly accustomed to violent exercise.

Other physicians have determined that the healthy heart can withstand the load placed upon it by the most strenuous of sports. The body appears to modify certain functions during periods of physical stress and subsequently returns to normal. Yet, it's smart to base your participation in sports upon your physical limitations. Sports activities should be tailored to the individual and be selected in consultation with your physician.

But, if you are sports-minded, go right ahead; you won't burn yourself out. In a study at Cambridge University, it was discovered that participants lived as long as spectators.

Too, counting the pleasure and fun you can get from athletics, sportsmen appear to be living a far happier and rewarding life than those who merely sit on the sidelines.

BEISEKER DOINGS

The oldest landmark of the Beiseker district, an eight-room residence erected in 1906 was sold recently by auction for \$100. The battered two-storey structure with kitchen lean-to is to be demolished.

The house was constructed for the Calgary Colonization Co. consisting of Mr. Beiseker, Mr. Sears and Mr. Mosher. The late Mr. Carl Seizler of Kelowna, B. C. purchased the farm from the Company, and later sold it to the late Mr. Joseph Schmaltz who turned it over to his son Anselm, who occupied the residence up to the date of sale.

The house was built for the Company's manager of a demonstration farm whose job was to show prospective settlers the grain growing possibilities of the district. These people were brought by train to Crossfield and the rest of the way by wagon. A feature of these pioneer days was the high pole on which the Canadian flag was raised whenever a company agent from Calgary appeared. All the pioneer farms in the Beiseker and Level Land districts were settled by the Calgary Colonization Company.

The old residence has been constantly occupied since early days and has semi-modern facilities. The tall trees beside the house are as old as the building and show the effects of storms endured during the past 50 years.

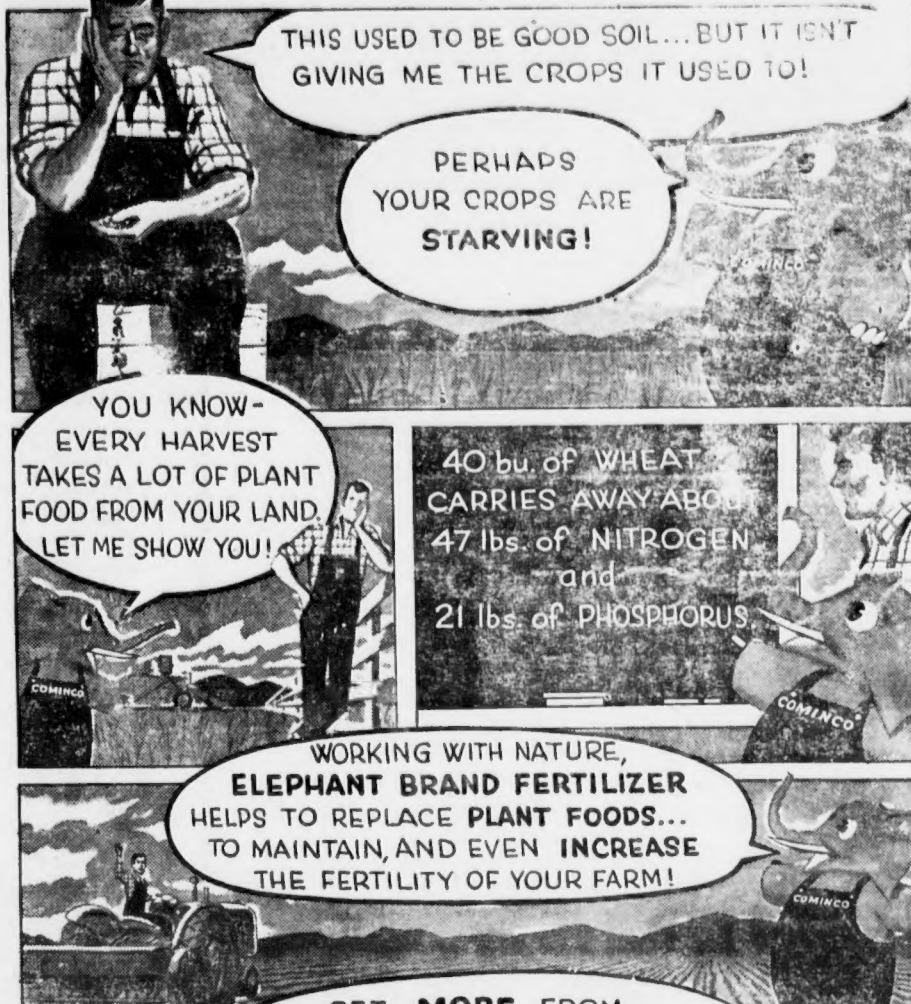

The first Christmas Seal Sale ever held was in Denmark. It was the idea of a postman, Ein-

ar Holboell, and he and his fellow postmen organized it in 1904. The funds were used to build a hospital for children with bone tuberculosis.

Mankind searched for centuries for a cure for tuberculosis and tried thousands of substances without success. The discovery of streptomycin by Selmar

Waksman marked the change in the tide. Streptomycin was first used in 1944. Its use has increased steadily and in addition other drugs have been found

CHEF'S CHOICE—Mince meat tartlets and turnovers, and Christmas cookies are Chef E. Manfred Roebing's idea of a festive addition to the traditional Christmas and New Year's

dinners. According to Roebing, chef of Canadian Pacific's famed "Alouette Room" in Montreal's Windsor Station, the tartlets, turnovers and cookies are taste treats especially appropriate during the Yuletide season.

Level Land

Mr. and Mrs. Marvin Dick were visiting with Pastor and Mrs. L. Bock of Saskatoon over the weekend. Pastor Bock was once a worker in the Alberta Conference.

Mrs. Emil Gramms, Mrs. Sam Leiske, Julia Stern and Joane Lang were weekend visitors at Canadian Union College.

SCIENCE IN YOUR LIFE

Science's Role In Animal Growth

An army, Napoleon declared, "marches on its stomach." And, nutritionists add, so does the butcher, the baker and every one of us. The outlook for keeping human-kind marching on comfortably-filled stomachs has become a lot brighter in recent years, thanks chiefly to scientific crop cultivation and new products that speed animal growth.

One of the most recent advances inducing weight and growth rate in animals illustrates again how a scientist coaxes nature to work for him even when he doesn't fully understand what makes her mechanism tick. Vigofac, a substance tracked down by researchers at the Pfizer Agricultural Research and Development Center in Vigo County, Indiana, produces gains greater than any feed supplements formerly available.

This unidentified growth factor has shown remarkable results when added to feeds already fortified with antibiotics and the traditional growth-promoting preparations. It enables the farmer to bring poultry and animals to market weight faster. Since less time is required, savings in feed are substantial.

Vigofac added to a basal chicken feed ration sends the bird to market a full week ahead of schedule. Used in combination with Terramycin, Vigofac increases weight gain even more.

Hogs reach 165 pounds on a substantial basic ration such as corn-soy. Given the same ration plus Terramycin, the animal hits 184. And when the combination is fortified with Vigofac, the same hog's avoirdupois zooms to a robust 200-plus. Farmers report that the Terramycin-Vigofac combination cuts market time by 28 days. Just three pounds of Vigofac per ton of feed formula will often do the job.

So far the agricultural scientist has been unable to pin down exactly how the Vigo factor works. Its anonymity perturbs him and he continues to probe with the hope of uncovering evidence that may lead to even more startling discoveries.

But the farmer looks at it differently. He isn't really concerned whether research can identify the Vigo factor. He sees the results in his barnyard. That's enough for him.

Mr. and Mrs. Jake Gimbel were visiting a few days in Edmonton with their daughter and son-in-law, Mr. and Mrs. D. Skortz.

On Nov. 23 a film was shown in the S.D.A. Church. The title was "Summons to Midnight". Guest speakers were Pastor Busy and Pastor Berkey. Visitors were: Ronnie Neish of Calgary, Mrs. Kuester of Calgary, Pastor and Mrs. Bucy and Pastor and Mrs. Berkey. Special music was given by Mrs. Kuester and Mrs. Bucy, a violin duet.

Visitors at the S.D.A. Church Nov. 24 were: Mr. and Mrs. Walter Weich of Endiang, Mr. and Mrs. Sparks of Wayne, Mr. and Mrs. A. Hunt of Acme, Mr. and Mrs. C. Saylor of Calgary. Guest speaker was Pastor Kuester.

Pastor R. H. Zima of Minneapolis, Minnesota was the guest speaker on Sat. night, Nov. 24 at the S.D.A. Church. He also showed films.

Mr. and Mrs. Fred Tetz of Trochu were visiting with the S.D.A. Church and district.

Roger Bechthold, Arnold Berreth, Dallas Kindopp, Mr. and Mrs. Ben Huether and Mr. and Mrs. Henry Stern were visiting at Canadian Union College over the weekend.

From Canadian Union College a week ago were Little Krinashein, Dicki Housch, Veolun Housch, Rita Goertzen and Dorothy Fuller visited Dec. 1st.

Mr. and Mrs. Dan Trefz of Hanna were visiting with friends and S.D.A. church a week ago.

Mrs. Sam McGee died on Dec. 10 at the home of her daughter Mrs. Emil Gramms.

Mrs. McGee, born in Liverpool, England, came to Ontario in 1885 and then moved to the Yukon with her family in 1901. It was there she married Sam McGee. Sam McGee was not cremated as the Robert Service poem indicated. He lived to the ripe old age of 70 working as a road contractor in Alberta and Saskatchewan. He continued

felt the lure of the north and went prospecting for gold in the Yukon on three different occasions. His last trip was in the late 1930s when the strain of carrying a 70-pound pack proved too much and he came back to Beiseker to die in 1940. According to his daughter, Mrs. Gramms, he made money prospecting, but he never became rich.

She said Robert Service used

her father's name in his poem because it rhymed easily and he was a noted Yukon character. Service was a bank teller and became acquainted with McGee when he came in to do business.

Mrs. McGee is survived by two daughters, Mrs. Gramms and Mrs. A. R. Triebwasser of Beiseker and a son, James of Kelowna, B.C.

Funeral service will be held Friday in the Level Land S.D.A. Church with Rev. C. Goertzen in charge. Burial will be in Rosebud cemetery.

FOR SALE—De Laval Spray Type 4-Can Milk Cooler. Double Unit Rite-Way Milking Machine complete with pipes and Motor. —Ike Ternes, phone 3335, Beiseker.

YOUR ALBERTA

THIS WILL BE THE FINAL "Your Alberta" column until after the Holiday Season, when this informative series will continue with the objective of explaining the workings of the Government of this great Province of ours—Alberta.

DID YOU SEE, IN A RECENT ISSUE

of "Within our Borders", the story about the new canals dug by the Department of Agriculture's Water Resources Branch in the Girouxville, McLennan area? From the length of the canals, one would be justified in believing those residents next summer when they say they're going to enjoy a "long, cool drink of water".

The scheme brought water some 18 miles across country to serve areas where they'd been importing water by railway tank car; and been often flooded out by too much water in the spring.

JASPER NATIONAL PARK—one of Alberta's popular tourist resorts.

ANYONE WHO DOUBTS THE VALUE of good roads to the Province's tourist industry had better have a chat with the chap at the park gates at Jasper. The hardtop highway to Jasper was completed this year, opened for travel in August. The man who sells the tickets at the park gates said that travel over that road since August was up 100 percent over last year. When you consider tourists spent about \$48,000,000 here last year, we can expect bigger things next year.

JUST TO SAVE YOU PENCIL AND BRAIN WORK,

that tourist revenue works out to about \$28 per person in direct revenue and untold amounts in indirect income through jobs being made available and products made to serve the visitors. Get your share?

THIS MATTER OF EDUCATION,

is, as you know, a terrific thing. Trouble is, few people are aware of just how far it goes. Take for example the new school for the deaf opened at Edmonton. Special education is needed there. Not only for humanitarian purposes, which is a good enough reason in itself, but also from the economic point of view. A deaf, or mute person, is worth more to himself and to society if he is the equal in education to his neighbors. He has as much right to it, as you have to yours.

So, as a result of this new school, there will be 120 pupils a year taking special education in lip reading, sound appreciation through vibration recognition, and talking without hearing. All these and more will be taught at the school. And, if you are the commercial type, it is worth mentioning that the school cost \$2½ million and three years to build.

Someone recently told of his reactions when he suddenly came upon the scene of an accident on one of our highways a short time ago. He arrived just as they were taking the victims from a smashed car. One was a young woman, scarcely more than a girl. She was dead. He was vehement in his declaration that "something should be done".

EVERYONE AGREES.

But what? Highway people are no more astute than anyone else in attempting to find a solution to the death toll. That's why, next spring, there is going to be another conference of all interested peoples, to try to find some way of making our roads safer.

As a word of caution—please for your own safety's sake and that of others, drive carefully over the Holiday Season. Make sure you don't wind up by being just a statistic!

BE SEEING YOU SOON!

Your Future is Here... In Alberta

Fundamentals of defensive play

One of the most difficult jobs any hockey coach has is teaching his players defensive fundamentals. Most players are concerned with improving their offensive play, and get lazy or inattentive when the coach talks defense.

Yet Happy Day, general manager of the Toronto Maple Leafs, said recently that he knew of dozens of top offensive stars in junior hockey who would never make the grade in professional hockey unless they learned how to improve defensively.

So, unless you want to be tabbed a "one way" hockey player, we suggest you pay attention to the following defensive fundamentals.

1. Always pick up your check as soon as possible when the opposing team gets the puck. Don't wait for him to come to you, because if you do he will probably be travelling too fast when he reaches you for you to stay with him.

2. When coming back with your man, always be alert to move in behind your defense to pick up any attempted flip-through play or loose puck. This was one of the reasons why Teeder Kennedy of the Maple Leafs was such a valuable man to have around.

3. Always be alert. Never relax your attention, even if play seems to be concentrated at another point far away from you. Stay with your man because the situation can change in a moment.

4. When an opposing player shoots on goal from a spot well away from you, do not just watch the play as a spectator or hope the puck will be picked up by a

teammate so you can go on attack—instead, see that your man doesn't shake you and go in for the rebound.

5. Leave your man only if there is an opposing player who is uncovered and in a more dangerous position than your man.

6. When a teammate is fore checking, stay between your man and the puck so that you can intercept any attempt to pass to him on a fast breakout play. Stay with him as closely as you can, but always try to stay between him and the puck.

7. Avoid any inclination to lag behind if the checker breaks past you or passes to another man.

8. Always remember to break fast and stay with the play. If you are left behind move as hard as you can to get up with the play again as fast as possible.

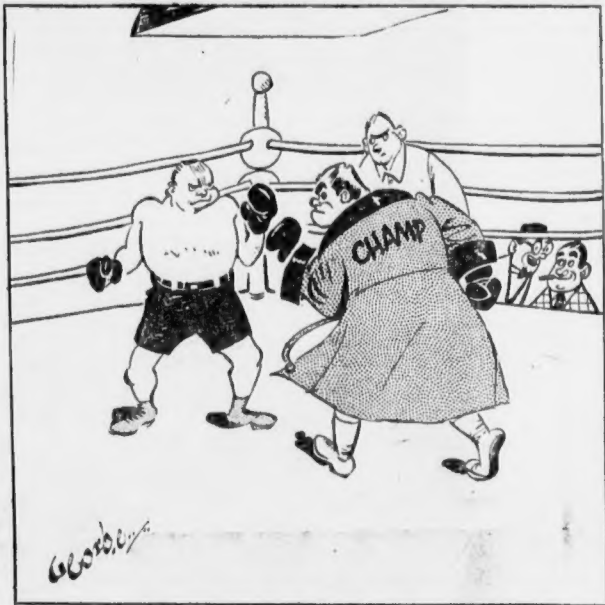

9. Your defensive obligation never stops as long as the opposing team has possession.

INFLATED ROYALTY—A perverse African breeze fails to upset Princess Margaret as she stands in the back of her "Land Rover", a specially made vehicle carpeted with zebra skins. The princess stopped at Michakos, East Africa, as part of her tour of the Dark Continent.

Ticklers

By George

"Sometimes I think the champ is overconfident!"

WEEKLY BIBLE COMMENT

JESUS OUTWARDLY PROCLAIMS HIS MESSIAHSHIP

It would appear on the surface that Jesus' triumphal entry into Jerusalem was at variance with what He had been telling the disciples about the nature of His kingdom.

Jesus had been trying to make it plain that His kingdom was not of this world. He had not come to set up material power, but for a deeper spiritual purpose.

Did not His triumphal entry into Jerusalem, with the people acclaiming Him as king, give an altogether different emphasis?

Jesus may have realized that "His hour was come," and that this was a great outward avowal of His Messiahship. He may have been challenging the faith and devotion to the people as He had already challenged the faith and devotion of the inner circle of disciples. He was inviting the people to recognize His Messiahship and thus prepare the way for the fulfillment of His earthly mission, which was so shortly to follow.

As a part of this outward witness to His own Messiahship came the symbolic purging of the temple and the driving out of those who had materialized religion.

So extreme an acknowledgment of His Messiahship, with its challenge, could not but bring results. While the people welcomed Him, throwing their garments in the way of spreading palm branches and crying, "Hosanna to the son of David," the priests and scribes, the official representatives of religion, were roused to indignation.

The very triumph of this entry of Jesus into Jerusalem may have intensified the opposition to Him and hurried the events that were bringing Him to His sacrificial death.

Travelling infection

Infections on other parts of the body may affect the eyes. An abscessed tooth, infected tonsils or nose may cause eye trouble. A check by a medical eye doctor will reveal these conditions and permit diagnosis and treatment. On the occasion of a medical examination, the eyes, ears, nose and throat should be included.

The spires of Ulm cathedral and the cathedral of Cologne, both in Germany, are the tallest in the world.

3222

Gardeners may correct errors

For vegetable gardeners whose last crop yield fell short of its promise, general sessions at the Manitoba Vegetable Association convention will be designed to help.

These sessions which will be open to all vegetable growers, members or not, will cover vegetable diseases, insect problems, soils and fertilizers, weed control, marketing, inspection and grading.

The convention is to be held in theatre "A" of the Broadway government buildings in Winnipeg, January 29, 30 and 31. Registration can be made through P. J. Peters, of the Manitoba Department of agriculture's extension service.

Gentle art

A gent who was a champion in the gentle art of getting into arguments, began expounding a position with increasing passion to a stranger next to him in the club car of the Santa Fe Chief. The stranger remained disturbingly uninterested.

The arguer hollered, "Don't you understand what I'm driving at? It is as simple as A-B-C."

"Could be," replied the stranger calmly, "but I am D-E-F."

GOO

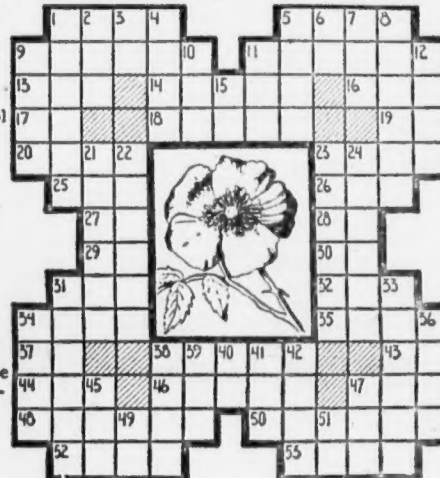

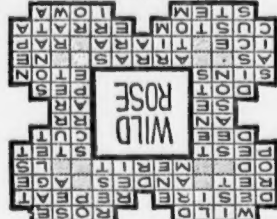

Somebody forgot to close a spigot at the Pacific Molasses Company, in Richmond, Calif., and an estimated 4,000 gallons of the goo oozed out—enough molasses for 10 million hotcakes.

Here's the Answer

RIVETS

By George Sixta

European air crews train across Canada under NATO plan

Canada has trained more than 4,150 pilots and navigators from Great Britain and nine other European countries in the last six years under the North Atlantic Treaty Organization plan for training air crews.

At the Royal Canadian Air Force pilot training base at Gimli, on Lake Winnipeg, 926 students now are undergoing training under this scheme, which was introduced to meet the acute shortage of trained air crews. This shortage disturbed Western military leaders when the North Atlantic Alliance was formed in 1949.

Canada pays cost

At Gimli—an Icelandic name meaning "a place of peace" or "heavenly abode"—the present group of trainees include Britons, French, Turks, Norwegians, Danes, and Belgians. Previous groups have included Dutch, Greeks, Italians, and Portuguese.

Canada, which is at present spending \$2,000,000,000 a year for defense, pays the cost of training the NATO air crews. The scheme is devised partly on the pattern of the Commonwealth air training plan of World War II which trained thousands of airmen in Canada for the Allied forces.

The students spend more than a year in Canada. They report first to the RCAF officers' school at London, Ontario, where they receive a three-week course on Canadian and RCAF customs and learn about the training program.

An essential part of the initial training for all but the British pilots is language instruction. For some, this phase lasts less than three weeks, but others may have to study for as long as six months.

Three schools

After the London course, students are ready to start air crew training. All pilots go to the new primary flying training school at Centralia, Ontario, for training on chipmunk aircraft. After that, they move on to one of the three flying schools at Moose Jaw, Sask., and Claresholm and Penhold, Alberta, for training on the more complex Harvard aircraft. Finally, the pilots go to one of three advanced flying schools, Gimli, Macdonald and Portage La Prairie, all in Manitoba, for training on Canadian-built T33 Silver Star jets.

Men being trained as navigators go to the air observers' school at Winnipeg.

Many families and organizations show great hospitality to the visiting airmen in an effort to make them feel at home in Canada.

Canadian defense officials are particularly proud of the air crew training plan. One senior officer said: "Nowhere has the true spirit of the North Atlantic Treaty Organization been more fully illustrated than in the intermingling of thousands of individuals representing the countries of the alliance."

Some of the most productive copper mines in the world are found in Arizona. 3222

SEALING WAX

Modern sealing wax usually does not contain any wax, although that used in the Middle Ages was a mixture of turpentine and beeswax.

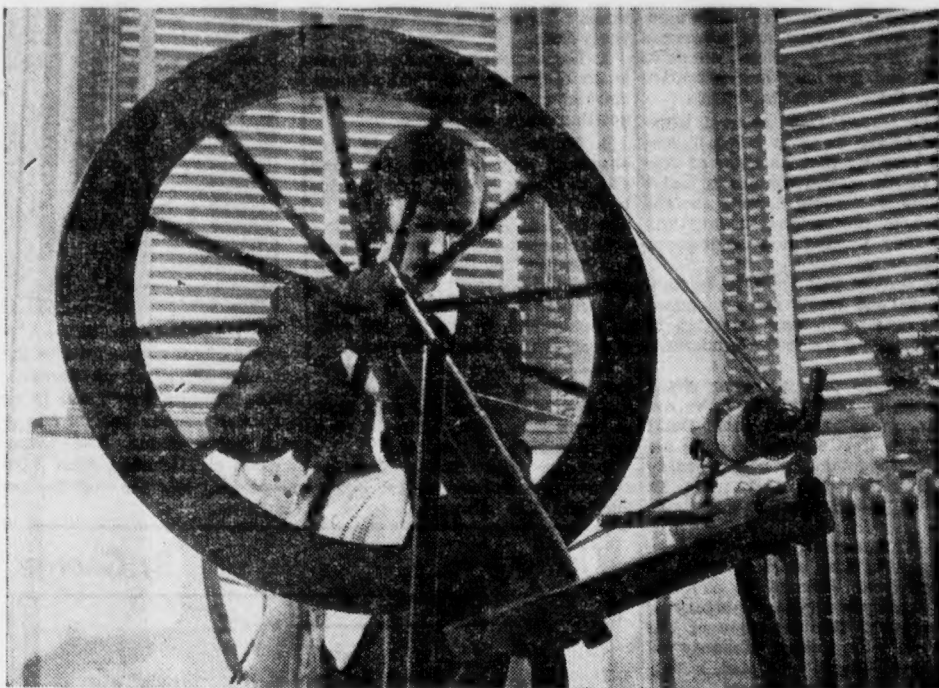

WOMAN FOR PRESIDENT

A woman, Victoria Claflin Woodhull, was once nominated for the presidency of the United States. She appeared on the Equal rights party ticket in 1872.

HIGHEST INTELLIGENCE

Scientists say that of all the creatures in the animal kingdom, the chimpanzee is the champion in intelligence. The lowest of intelligence are the horse and the dog.

Housekeeping School

Good housekeepers don't grow like Topsy. Grandma learned by the trial and error method but today's young women can take one of Canada's numerous courses in domestic science. At St. Jacques-de-L'Achigan, Quebec, arts and handicrafts are part of a well designed curriculum to prepare the student for her future role as homemaker.

Making and watching the garden grow is a happy hobby that pays off in a well-stocked larder. The School Farm gives students a basic knowledge of gardening as well as plant life for home medicinal purposes.

The social graces are an important part of the training. Top physical education teachers provide the girls with lessons in dancing as well as gymnastics.

National Film Board of Canada photos by Gar Lunney

A fourth year student keeps a young visitor amused between bites. The care of children is an aspect particularly stressed in home-making courses. A ten day stay in a public nursery under careful medical supervision is a compulsory part of a course in family education.

The student receives an aptitude or competence certificate after two or three years of study, and on completion of the full four year course, a university degree which entitles her to teach in the primary classes of a domestic science school.

Tourists shopping for bargains at Shannon airport.

Customs-free Shannon airport Ireland's welcome to world

By STEVE LIBBY
(Written Especially for CPC)

Want to buy golf balls at \$7 per dozen? Scotch at \$1.50 a fifth? How about an Irish tweed, hand-woven sport jacket for a mere \$30? You can—and so can anyone else—at the world's only customs-free airport.

There are other bargains of even greater value which may be purchased at bargain-basement prices and brought to the home of the tourist (legally, too!) in value up to \$500.

The thoughtful Irish have gone one step further. Now it is possible to order these bargains by mail at far below normal costs, by the simple expedient of the postman collecting small duty for the articles when they are delivered to your home.

This shopping miracle is available to all in the picturesque Shannon airport terminal building in Ireland, not far from Limerick. This city of 43,000 is where the River Shannon widens to meet the Atlantic ocean. In this remote corner of southwestern Ireland is one of the world's leading airports.

Shannon sounds today differ greatly from those of the not-too-distant past. Where the call of the wild duck or curlew once was interrupted only by the blast of the huntsman's shotgun now is the scene for roaring DC-6s, Strato-cruisers, and Super Constellations. Vital to world transportation and international trade, Shannon is Ireland's welcome to the world and the last stop for the traveler leaving the old world for the new.

This "Gateway to Europe" was completed a dozen years ago at a cost of nearly \$9 million to the Irish government. Each year, more than 300,000 international air passengers utilize its friendly facilities.

Ideally situated for the airlines, Shannon is some 500 miles west of Paris and London, in a direct line with New York and London. It's the ideal spot to load up with duty-free gasoline prior to the long and lonely Atlantic crossing. Twenty-five million gallons are sold each year from the airport's huge storage tanks—all duty-free though the Irish government adds a concession charge of one-tenth of a cent per gallon.

By stopping over at Shannon for refuelling seven extra passengers can, under normal operating conditions, be taken aboard a New York Stratocruiser (which burns

500 gallons of gasoline an hour) in the French capital. This means an additional revenue of some \$2,940 to the airline in addition to the considerably lower fuel costs at Shannon—"good business," to put it mildly.

At this first duty-free airport in the world are spacious warehouses storing premium quality merchandise from all corners of the world, later trans-shipped to other nations without customs formalities.

It is through the two customs-free shops in the terminal, however, that Shannon has gained much of its international fame. Cigarettes are at half American prices, French perfumes are cheaper than in Paris, German cameras cost less than in Berlin, and Swiss watches can be purchased far below retail in Geneva's Rue du Montblanc.

Irish handicrafts—tweeds, linens, glassware, knit goods, toys and many other items native to the "Ould Sod" are on display at astonishingly low prices. The girls in the two shops are carefully selected for good looks, charm, and ability to sell.

It all began in 1942 as a tiny shop at the amphibian base across the river, with a staff of a dozen employees and an income rarely exceeding \$15 daily. Now there is a payroll of 400 and a daily income of near \$9,000.

The latest development is a mail order department which issues a beautifully designed price list in color available to all Americans and Canadians. Needless to say, orders for the low-priced merchandise are pouring in. Ireland hopes to build up a \$300,000 yearly business in mail order alone, and well may exceed that amount in the early future.

Breakfast, a snack, lunch, dinner, or bar service are available at Shannon airport at any time of the day or night. Ireland's only 24-hour-a-day post office is at the airport and the branch office of the Bank of Ireland stays open until 1 a.m. to serve the thousands of businessmen, tourists, servicemen, travellers and "commuters" utilizing the facilities of the airport.

Today, Shannon is not only the most up-to-date airport in Western Europe, but from a technical and meteorological standpoint it is unparalleled. It is free from natural or artificial obstruction and has the best "fog clear" record of any major airport.

THE NAME'S TO BLAME

What's in a name? George G. Paniwozik will readily supply an answer to this query. Seeking permission to change his surname, he explained to officials that he had lost a number of jobs because employers could not pronounce his name, spell it, or remember it.

IN THE HOME WORKSHOP

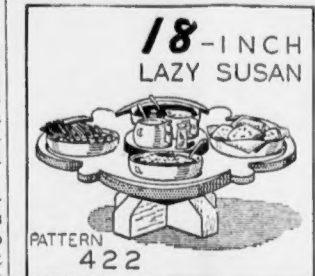

Jolly Santa

Here is jolly old Santa himself with his full pack at your door all during the holiday season. Everyone will love him and he is easy to cut out, when you have a good pattern drawn in proper scale. Paint him in bright colors and if you use any of the tempered hardboards he will stand lots of

weather and may be stored away for future holidays. Ask for pattern 359 and enclose 25c with name and address. If you are in a hurry to get your copy of the Santa pattern include 5c extra for air mail postage. Your pattern will be mailed the day your order is received.

No more, "... please pass the sugar, salt, relish, bread..." with this lazy susan on the table. It may be cut out of plywood with a base of solid stock and assembled in an evening. The pattern also gives variations of the design

which may be used for parties and a holiday centerpiece. One is a 4-sided tree cut out of thin plywood lollipops, candy on toothpicks, to stand 6 inches high and hold stuck into the four sides of the tree. There is a 6-inch-high brightly painted figure to stand in the center to hold a dish of goodies. These are specials for the holidays but the lazy susan is a handy piece the year 'round. Pattern 422 is 25c.

Address order to:

Vancouver, B.C.

Chilly dish for chilly days

"The melancholy days are here," sang the poet Bryant (who didn't like autumn). The snow will soon be flying, the winds piercing, the puddles freezing over, and the demand for tongue-cooling, bone-chilling ice cream—will keep right on!

The sales saturation point for ice cream and its allied concoctions, observes one member of the ice-cream industry, is limited only by a certain economic inelasticity of youth's weekly allowance.

As for its allied concoctions, Mr. J. H. Bushway of West Newton, Mass., is quoted as saying he served the first ice-cream soda quite unintentionally to a dryman, who wanted his soda water colder, by dropping in a scoop of ice cream. The ice-cream cone, it is said, was introduced at the Louisiana Purchase Exposition in 1904, also inadvertently, by an ice-cream parlor proprietor who ran short of dishes and "made do" with a stack of thin waffles he had on hand.

Patterns

Knit for college

by Alice Brooks

Easy-knit this set as a smart protection against winter! Just two ounces of knitting worsted for short hood in small, medium sizes.

Pattern 7389: Knitting directions for long, short hood, mittens; small, medium, large sizes included. Stockinette, pattern stitch.

To obtain this pattern send twenty-five cents in coins (stamps cannot be accepted) to:

Household Arts Department,
Department P.P.L.,
60 Front Street W., Toronto.

TALL A LA TEXAS—Gilbert Reichert, of Cleveland, Ohio, gives even Texans something to think about during a recent visit to the Lone Star capital of Austin. Gil stands eight feet, four inches tall, weighs in at 327 pounds. Supporting it all are size 20 boots. Even Texas, the land of outsized everything, is hard put to top this guy.

Christmas delight

Doll Wardrobe

by Anne Adams

Thrilling Christmas gift—TEN garment wardrobe for your little one's favorite dolly! Each item is sew-easy—fun to make! Party Dress! School Dress! Suspender Jumper! Blouse! Coat! Pixie Hat! Nightie! Robe! Slip! Panties!

Pattern 4526: in Doll Sizes 14, 16, 18, 20, 22 inches tall. You can use scraps for many of these garments. See pattern for yardages.

This pattern easy to use, simple to sew, is tested for fit. Has complete illustrated instructions.

Send thirty-five cents (35c) in coins (stamps cannot be accepted) for this pattern. Write plainly Size, Name, Address and Style Number and send orders to:

Anne Adams Pattern Dept.,
Department P.P.L.,
60 Front Street W., Toronto.

Be sure to write plainly your Name, Address and Pattern Number.

Morale booster

Morale was very low at the Gypsum Novelty Company, so Mr. Gypem decided to employ a recreation director for the specific purpose of boosting spirits. One day the director assembled all the workers and told them of a wonderful new plan.

"When you are working here five years," he said, "you get a beautiful green certificate which says you've given valuable service for five years. When you are working here 10 years you get a gorgeous blue certificate which says we appreciate very much the valuable services rendered to the firm during the past 10 years. And when you are working here 15 years you get a badge."

"What does the badge say?" asked one of the men.

"Why—er, the badge says, 'this man has a green and a blue certificate—'"

POPULATION LESS

Canada has less than four persons per square mile of territory, compared to more than 50 persons per square mile in the United States.

Monks were the time keepers of the Middle Ages.

3222

MY FAMILY LOVES THIS RASPBERRY Double-boiler Pudding!

Grease upper pan of double boiler generously. Measure into pan:

1 1/4 c. (10 oz. can) canned raspberries and syrup
1/4 c. granulated sugar
2 tps. corn starch
Mix well and set aside.

Sift together:

1 1/4 c. once-sifted pastry flour
or 1 1/4 c. once-sifted all-purpose flour
1 1/2 tps. Magic Baking Powder
1/4 tsp. salt
Cream
3 tps. shortening
Blend in:
1/2 c. granulated sugar
1 egg
Combine:
1/2 c. milk
1/4 tsp. vanilla
1/2 tsp. grated lemon rind

Add dry ingredients to creamed mixture alternately with flavored milk, combining lightly after each addition. Turn into double-boiler over raspberries. Cover closely and cook over boiling water until batter is cooked—about 1 1/4 hours—add boiling water, if necessary, to under pan.

Turn hot pudding out onto a deep serving dish. Pass chilled custard sauce or pouring cream. Yield: 4 or 5 servings.

MAGIC protects all your ingredients. Get lighter, finer-textured results... buy MAGIC Baking Powder today.

**HAIL SUPPRESSION
PLEBISCITE NEXT MONDAY**

We particularly want to remind everyone of the importance of voting Dec. 17 for a hail suppression project in the Kneehill and Mountain View Municipalities.

After last summer's demonstration we can realize this is the most important decision ever to come before a farm group in the west.

We realize the natural opposition of most of us to raising our ordinary taxes.

To anyone seriously considering opposing this plebiscite for this reason we present the fact that this is the first time we have been able to vote to put money in our pockets.

There is every reason to believe hundreds of farmers were saved enough crop last year to pay their costs of hail suppression for three or four generations. Anyone sparing themselves 10 bushels per acre hail losses in any one year have saved themselves the cost of hail suppression for their life-

time of farming.

We realize some farmers lost crop to hail this year but the remarkable fact remains that none lost their entire crop and only a scattered few lost even 50%.

By voting favorably this year you are stating you are willing to pay your share and this should really be paid before tax notices are even out.

Directors,
Kneehill Hail Suppression
Association Ltd.

Sam Leiske, Frank Grainger, Art Berreth, Ed Schwarzenberger, Jerry Schissel and Matt Schmaltz of Beiseker and Art Bates and Ralph Brown of Acme attended the official opening by Mr. R. Putnam, Deputy Minister of Agriculture of the Balzac Municipal Seed Cleaning Plant. He congratulated the people of Rockyview Municipality on having such a fine plant which is the most modern in the Province. He said the Balzac Plant is the 18th in the Province while 3 or 4 more are organized to build

next summer.

The drive to sell shares for the Beiseker Plant is going going ahead very well from all reports we have. Mr. Matt Schmaltz, Chairman of the K.I.B. Seed Cleaning Plant would like to urge the canvassers to try to complete their drive by the end of the year so the organization can be completed with the various municipalities and the Dept of Agriculture early in the new year so that the building of the Plant can be commenced in the spring.

Here! New Task-Force 57 Chevrolet Trucks!

Performance-proved in a history-making test on the ALCAN Highway to Alaska

Here are the trucks that conquered the Alcan Highway — one of the world's most challenging roads! Six new '57 Chevrolet trucks, loaded with cargo, roared north from Dawson Creek, B.C., through 1,520 miles of mountains and mire, rain and hail — every conceivable natural roadblock — to Fairbanks, Alaska. Running around the clock, they made this tortuous trip — normally a 72-hour run — in less than 45 hours.

Like a carelessly unwound ribbon, the Alcan Highway twists and reels for 1,520 miles. It tumbles over towering mountains of awesome beauty and wanders through desolate Yukon forests. A miracle of engineering — but a brutal challenge to trucks.

It's the road where trucks grow old before their time. The road where gravel endlessly

sledgehammers the life out of trucks. Where a fog of superfine dust chokes engines, and vicious ruts subject chassis to months of wear in a few hundred miles.

This is the road that was chosen to give the new '57 Chevrolet trucks a supreme test of stamina, performance and handling ease. The results of that test made hauling history!

Six new Chevrolet trucks — representing light-, medium- and heavy-duty models — travelled the length of the Alcan highway in less than 45 hours. They ran day and night — but this was no test of speed. It was a measure of the ability of these new Chevrolet trucks to perform under typical conditions on the truck-killing Alcan run. The Chevrolet fleet made normal stops along the way, and maintained safe and legal speeds. As a special additional test during the run, two of the trucks went the entire distance without once having their engines stopped!

It's all down in the AAA record book. And more besides! Never before has a new truck been so thoroughly proved. Come in and look over these new Alcan champs!

FIRST WITH THE MOST MODERN FEATURES!

New 283-cubic-inch Taskmaster V8 delivers 160 high-torque horsepower. Standard in Series 1800 and 1700, optional in Series 1300 through 1600 at extra cost. Horsepower ranges up to 220 in Chevrolet's complete line-up of modern V8 and 6 truck engines. Revolutionary Powermatic Transmission! This six-speed automatic, designed specifically for heavy-duty hauling, is an extra-cost option in series 1600 through W1900 models. Hydromatic is offered in 1300, 1400 and 1500 Series models at extra cost. New 1957 work-styling gives Chevrolet trucks an even fresher, fleetier appearance. There are three different and distinctive treatments.

Low Cab Forward models outdate the C.O.E. because they're lower, handsomer, easier to get into and out of, and save time in routine engine maintenance. Yet they offer all the traditional Cab Over Engine advantages.

Heavyweight Champs with Triple-Torque tandem are rated at 32,000 lbs. GVW, 50,000 lbs. GCW. And Chevrolet's advanced tandem rear axle unit offers a built-in three-speed power divider—plus a unique "self-steering" action that reduces tire wear and increases handling ease.

(AAA) The Chevrolet Alcan run was sanctioned and official results certified — by the American Automobile Association.

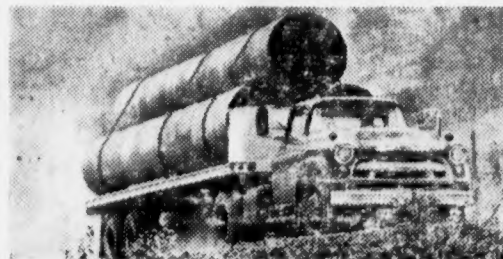

Proved on the Alcan Highway... Champs of every weight class!

Alcan fleet reports up to 20 miles per gallon! That's based on official AAA fuel consumption figures for the Cameo Carrier, powered by the famous Thriftmaster 6 engine and equipped with Overdrive (optional at extra cost).

All the way in DRIVE range with Powermatic! As a special test, this Powermatic-equipped 1900 Series tractor travelled the length of the Alcan Highway — up mountains and through washouts — in a single forward-speed range!

New Super Taskmaster V8 flattens Yukon mountains! This 1957 1800 Series truck with its new 283-cubic-inch V8 engine was more than a match for Alcan mountains. It climbed towering grades with jackrabbit agility.
